***Teepol — as a laboratory aid**

The importance of Teepol as a laboratory aid is, perhaps, not so well-known as its power of cleaning, which is already widely established.
This sodium higher alkyl sulphate—stable over a wide *p*H range—possesses valuable wetting properties, most useful in the dispersal of insoluble powders and pigments prior to analysis; in the wet grading of stone aggregates in mineralogical practice; in emulsification; in determination of specific gravity and in the preparation of metallurgical specimens. Many other uses will be apparent to the scientist in his own field.
Fuller information on the many uses of Teepol as an aid to laboratory work are contained in Technical Information Sheet No. 277, a copy of which will be sent on request.

Shell Chemicals Limited
(DISTRIBUTORS)

112, Strand, London, W.C.2

Supplies of "Teepol" for laboratory use, in 4-gallon tins, are obtainable from: The British Drug Houses Limited B.D.H. Laboratory Chemicals Group Poole, Dorset.

★*Registered Trade Mark of Shell Chemicals Limited.*

QUANTUM THEORY OF FIELDS

By G. WENTZEL
University of Zurich, Switzerland

CONTENTS

General Principles.—The Canonical Formalism; Conservation Laws for Energy, Momentum and Angular Momentum; Complex Field Functions; Conservation of Charge; Lorentz Invariance. Time Dependent Field Operators and Their Commutation Relations: Introduction of the Momentum Space.

Scalar Fields.—Real Field in Vacuum; Real Field with Sources; Complex Field in Vacuum; Complex Field in Interaction with Protons and Neutrons; Combined Charged and Neutral Field; Charged Particles in the Electromagnetic Field.

The Vector Meson Field.—Complex Field in Vacuum; Vector Mesons in the Electromagnetic Field; Nuclear Interactions; Meson Theory and Nuclear Forces.

Quantum Electrodynamics.—The Electromagnetic Field in Vacuum; Interaction with Electrons; Theory with Individual Time Co-ordinates; Remarks to the Problem of Self-energy.

The Quantization of the Electron Wave-Field according to the Exclusion Principle.—Force Free Electrons; Electrons in the Electromagnetic Field.

Supplementary Remarks.—Particles with Higher Spin; Spin and Statistics; Outlook.

1949 225 pages 36s.

HIGH-GRADE WRIST CHRONOGRAPH

Registering 1/5th seconds

17 jewelled lever movement with shock-resisting device, non-magnetic hairspring and latest type of temperature compensation. Cased in stainless steel.

One push-piece has three pressure action: start, stop, restart; subsidiary dial registers up to 30 minutes; a second push-piece enables the registration to be returned to zero.

The stop watch action is independent of the normal function of the watch as a timepiece.

Further particulars of this and other watches will gladly be sent on request

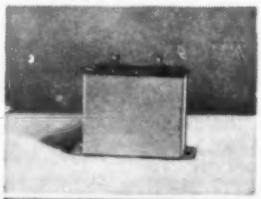
Transformers made to measure



SAVAGE TRANSFORMERS are built to satisfy customers' individual requirements — they are *not* mass-produced. They are designed specially for the work they have to perform.

Every SAVAGE TRANSFORMER is subjected to exhaustive electrical and mechanical tests before despatch, to ensure years of faultless service. Available in all capacities up to 5kVA.

If yours is a TRANSFORMER PROBLEM—write to us. We can solve it. Please address technical enquiries personally to our Mr. W. BRYAN SAVAGE M

LIGHTING TECHNIQUE

by Prof. B. F. FEDOROV and W. T. O'DEA, B.Sc.

This translation from the Russian covers all aspects of illumination from the elements of the physiology of vision to the design and execution of various types of lighting.

Demy 8vo. Illustrated. 25/-

PRINCIPLES OF AGRICULTURE

by Prof. W. R. WILLIAMS

Based primarily on modern Soviet methods, of which the author was one of the founders, this book is a valuable treatise on his latest ideas of soil cultivation.

Demy 8vo. Illustrated. 15/-

BASIC NAVAL ARCHITECTURE

by K. C. BARNABY, O.B.E., B.Sc., M.I.N.A.

"Unquestionably this is an important book . . . which with its individual approach to the problems of ship design and its lucid expositions . . . constitutes an outstanding contribution to shipbuilding literature. We congratulate the author and his publishers on its appearance."—*The Shipbuilder and Marine Engine-Builder.*

WRAYSBURY nr. STAINES
MIDDLESEX ENGLAND
Telephone - Wraysbury 62 & 137

Juglone	6/- G	Aluminium *iso*-propoxide (500-g. tins)	45/- K
Quercetin	13/- D	Glycine ethyl - ester hydrochloride	15/- H
Nitro-urea	12/- H	2,4,Dinitro-phenyl-hydrazine	11/- H
Anisic acid	10/- H	p-Amino-hippuric acid	40/- H
Azelaic acid	35/- H	β-D-Glucose penta-acetate	36/- H
Cyclopentanol	9/- D	Phenyl hydrazine (99·5%)	10/- H
Hippuric acid	7/- H	Acetamino-malonic ester	70/- H
Acetyl glycine	25/- H	Cyano-acetic acid (97%)	17/- H
ω-Nitrostyrene	36/- D	2,4,6-Collidine (90%)	60/- K
Chelidamic acid	25/- H	N-Bromo-succinimide	15/- H
β-Ionone (98% β)	28/- H	2-Methyl resorcinol	10/- D
iso-Amyl nitrite	20/- H	6-Methyl quinoline	23/- H
Cinchomeronic acid	15/- D	N-Ethylpiperidine	33/- H
Acrolein (monomer)	15/- H	*iso*-Ascorbic acid	9/- D
iso-Nicotinic acid	6/- D	Diketohydrindene	5/- G
Acetone cyanohydrin	29/- H	Dibenzyl ketone	13/- H
2-Methyl-3-butyn-2-ol	85/- H	Laevulinic acid	12/- H
Acridine hydrochloride	12/- D	Ethyl malonate	40/- K
Phenyl-mercuric nitrate	50/- H	Cyclopentanone	45/- H
Phenyl-mercuric acetate	26/- H	Allyl sulphide	30/- H
Cetyl pyridinium bromide	35/- H	Aconitic acid	14/- D
Cumene (*iso*-propyl-benzene	6/- H	Cytochrome C	900/- G
α, α-Dipyridyl hydrochloride	12/- G	Acetonitrile	40/- K
Aluminium oxide (chromatography)	30/- K	Mucic acid	36/- K
Ethylene-diamine tetra-acetic acid	30/- H	Nioxime	3/- G

EDWARD ARNOLD & CO.

A Selection of Scientific Books

Physics

IONS, ELECTRONS AND IONIZING RADIATIONS. By **J. A. Crowther,** Sc.D., F.Inst.P. **Eighth Edition.** xii+322 pages, with 7 plates. **21s.** net.

INTERMEDIATE PHYSICS. By **C. J. Smith,** Ph.D., M.Sc., A.R.C.S. **Third Edition.** xii+1,033 pages, 709 diagrams. **24s.** net.

Also obtainable in Parts. Part I. **Properties of Matter, 4s. 6d.** net. II. **Heat, 5s.** net. III. **Optics, 6s.** net. IV. **Acoustics, 3s. 6d.** net. V. **Magnetism and Electricity, 8s. 6d.** net.

THE GENERAL PROPERTIES OF MATTER. By **F. H. Newman,** D.Sc., F.Inst.P., and **V. H. L. Searle,** M.Sc. **Fourth Edition.** xii+431 pages, 114 diagrams. **25s.** net.

SOUND, A PHYSICAL TEXT-BOOK. By **E. G. Richardson,** B.A., Ph.D., D.Sc. **Fourth Edition.** viii+344 pages, 118 diagrams. **18s.** net.

INTERMEDIATE HEAT. By **F. Tyler,** B.Sc., A.Inst.P., Ph.D. xii+430 pages, 191 diagrams. **12s. 6d.**

A LABORATORY MANUAL OF PHYSICS for Higher Certificate, Scholarship and Intermediate Science Students. By **F. Tyler,** B.Sc., A.Inst.P., Ph.D. 207 pages, illustrated. **7s. 6d.**

ELECTRICITY AND MAGNETISM. By **M. Nelkon,** M.Sc., A.K.C. viii+430 pages. **10s. 6d.**

Chemistry

THE CHEMISTRY OF THE POLYSACCHARIDES. By **R. J. McIlroy,** M.Sc., Ph.D. 120 pages. **10s. 6d.** net.

OUTLINES OF ORGANIC CHEMISTRY. By **E. J. Holmyard,** D.Litt., F.R.I.C. **Second Edition.** xii+468 pages, 30 diagrams and 6 plates. **12s.**

SYSTEMATIC QUALITATIVE ORGANIC ANALYSIS. By **H. Middleton,** M.Sc., A.R.I.C. **Second Edition.** viii+280 pages. **9s.** net.

A HANDBOOK OF ORGANIC ANALYSIS. By **H. T. Clarke,** D.Sc., F.R.I.C. **Fourth Edition.** xvi+363 pages, with Table of Common Compounds. **9s.** net.

INTRODUCTION TO THE MODERN THEORY OF VALENCY. By **J. C. Speakman,** M.Sc., Ph.D. **Second Edition.** viii+159 pages. **6s.** net.

Biology

ELEMENTARY MICROTECHNIQUE. By **H. A. Peacock,** M.Sc. **Second Edition.** xii+330 pages, with 21 diagrams. **9s.** net.

PRACTICAL BOTANY. A First Year Course for University and Intermediate Science Students. By **S. Williams,** D.Sc., F.R.S.E., and **G. Bond,** Ph.D. 96 pages, with 8 illustrations. **6s. 6d.** net.

PLANT ECOLOGY. By **Hilda Drabble.** 142 pages, with 12 plates. **8s. 6d.** net.

Agriculture

AN INTRODUCTION TO THE SCIENTIFIC STUDY OF THE SOIL. By **N. M. Comber,** D.Sc., A.R.C.S., F.I.C. **Third Edition.** viii+206 pages, with 25 diagrams. **7s. 6d.** net.

AN INTRODUCTION TO AGRICULTURAL CHEMISTRY. By **N. M. Comber,** D.Sc., A.R.C.S., F.I.C., **H. T. Jones,** M.Sc., A.R.I.C., and **J. S. Willcox,** B.Sc., A.R.I.C. viii+315 pages, with 24 diagrams and 27 tables. **9s.** net.

THE SCIENTIFIC PRINCIPLES OF PLANT PROTECTION. By **Hubert Martin,** D.Sc., A.R.C.S., F.R.I.C. **Third Edition.** xii+385 pages. **25s.** net.

LEGUMINOUS FORAGE PLANTS. By **D. H. Robinson,** Ph.D., B.Sc., N.D.A. **Second Edition.** viii+119 pages, with 35 original drawings. **8s. 6d.** net.

Geology

A TEXT-BOOK OF GEOLOGY. By **P. Lake,** M.A., F.G.S., and **R. H. Rastall,** Sc.D., F.G.S. Revised by **R. H. Rastall. Fifth Edition.** viii+491 pages, 32 plates and 129 sections and maps. **28s.** net.

A GEOLOGY FOR ENGINEERS. By **F. G. H. Blyth,** M.Sc., A.C.G.I., D.I.C., F.G.S. **Second Edition.** viii+329 pages, 16 plates and 148 diagrams. **24s.** net.

OUTLINES OF PALAEONTOLOGY. By **H. H. Swinnerton,** D.Sc., F.Z.S., F.G.S. **Third Edition.** viii+393 pages, 368 diagrams. **32s. 6d.** net.

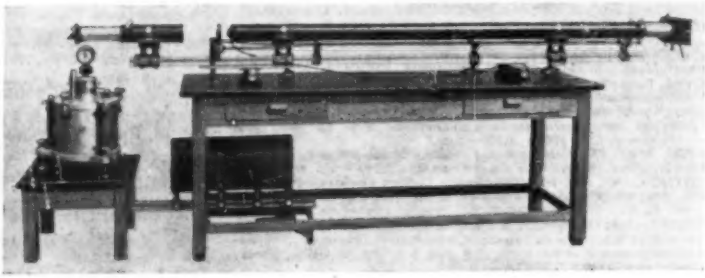
50,000 R.P.M. ULTRA-CENTRIFUGE



The Phywe Ultra-Centrifuge has become a firmly established research tool for preparative as well as analytical work and is now almost indispensable for investigations of macro-molecular and colloidal solutions. It enables the determination of the size and shape of large molecules, the measurement of the sedimentation constant and tests for homogeneity particularly on such systems as synthetic high polymers and proteins (enzymes, viruses, etc.). The visual observation and photographic recording of the moving boundary during the course of sedimentation is carried out with the optical equipment which is easily adaptable to the Lamm Scale, Toepler-Schlieren and Philpot method. Full particulars are available on request.

SHANDON SCIENTIFIC COMPANY · 2 ROBERT STREET · LONDON W.C.2

Will this help you?

A calculation like $\frac{\cdot 0147 \times 38 \cdot 93}{\cdot 0041 \times 962 \cdot 1}$ can be solved without pen or paper in a few seconds with the Otis King Calculator. This precision-made instrument calculates multiplication, division, proportion and percentages, and saves hours of figure work. It has the capability of a single scale 66" slide rule yet closes to pocket size.

MACMILLAN

Intermediate Practical Physics

T. M. YARWOOD

Besides carrying out a thorough revision, Mr. Yarwood has provided thirty-four additional experiments with the appropriate theoretical notes for the second edition of this book, which provides all that is required for a full school course.

Second edition. 9*s*. 6*d*. net.

The Natural History of Mosquitoes

MARSTON BATES, M.A., Ph.D.

This authoritative work, which will be of interest and value to students of biology, medicine and public health, deals with a limited group of animals from a broad and general point of view. The behaviour of the adult stage is treated first, and other topics considered at length include time and place of flight, orientation reactions, longevity, dispersal, seasonal distribution, sexual behaviour, food habits, egg development and oviposition. A chapter on mosquito eggs then follows, and there are four chapters which discuss the larval stage, covering the physical and chemical environment, the biological environment, the behaviour and physiology of larvæ, and the classification of breeding places. The second part of the book is devoted to mosquitoes in relation to certain topics of general biological interest.

Illustrated with photographs, drawings and tables. 37*s*. 6*d*. net.

Fundamentals of Qualitative Chemical Analysis

ROY K. McALPINE, Ph.D., and BYRON A. SOULE, Sc.D.

This text-book covers both the theoretical aspects and the practical details of inorganic qualitative analysis at a higher schools certificate and first-year university standard. Consequently it is designed both to increase the student's knowledge of inorganic chemistry and to emphasize the necessity of working under controlled conditions in order to carry out desired reactions successfully. For this third, revised edition the following changes have been made: The questions and problems formerly at the ends of the individual chapters are given in a single list near the end of the book. Some of the earlier examples have been omitted and others added to give a better balance. The discussion of ionization theory in analytical processes has been largely rewritten to present both the chemistry and the calculations in a more direct form.

Third edition. 26*s*. net.

Stability

F. E. DESSAUER

During the last two centuries, public opinion has accepted the progress of civilization as an undeniable fact though, as the author of this book points out, there have been many great thinkers who have refused to abide by the popular concept. Generally speaking, public opinion has remained deeply impressed by the visible signs of progress, and Mr. Dessauer shows us that such advances as improvements in the standard of living and the promotion of democracy supported the optimism of the period in which the voices of the poets and the chorus of the scientists and thinkers joined when they raised hopes for better times and better men. The book will interest the economist, the historian, the lawyer, the business man, students of philosophy and of world affairs, and all who look with open eyes at the drama of life around them. 26*s*. net.

An Advanced Treatise on Physical Chemistry

VOLUME ONE
Fundamental Principles and The Properties of Gases

J. R. PARTINGTON, M.B.E., D.Sc.

A new work which will prove of first-class importance. In addition to descriptions of apparatus and experimental methods, valuable and comprehensive collections of numerical data are given in the form of tables, many of them being compiled from material not easily accessible. There are very full references to the literature of the subject, and also a large number of empirical or semi-empirical formulae which are likely to be of interest to laboratory workers, chemists or engineers engaged in large-scale work. The volume is fully illustrated with graphs and diagrams. It will be followed by other volumes now in preparation. 80*s. net.*

A New Dictionary of Chemistry

edited by STEPHEN MIALL, LL.D., B.Sc. *and* L. MACKENZIE MIALL, B.A., A.R.I.C.

This comprehensive one-volume dictionary of chemistry, just published in a new edition, contains explanations of terms used in chemistry and chemical engineering, accounts of chemical substances, operations, drugs, vitamins, and other bodies of biochemical importance, and biographies of the principal figures, ancient and modern, in the history of chemistry. In this edition the text has been completely revised, many new articles incorporated and many others rewritten to bring them into line with modern developments. 60*s. net.*

MACMILLAN

Theoretical Hydrodynamics

Professor L. M. MILNE-THOMSON

The general aim and plan of the First Edition remain unaltered, but the work has been largely rewritten. The subject of two-dimensional motion has been greatly simplified by the discovery of the "circle theorem", which enables the perturbation of a given irrotational flow by the introduction of a circular cylinder to be written down without calculation. This theorem renders trivial problems connected with a single circular cylinder, and, by conformal transformation, cylinders of other cross-sections.

Second edition. 60*s*. net.

★

Principles of Electricity

Professor LEIGH PAGE and Professor NORMAN ILSLEY ADAMS

The purpose of this book is to provide a theoretical text suitable both for students who have completed general courses in physics and calculus, and for advanced students who require a more comprehensive training in the important subject of electromagnetism. Considerable space is devoted to the theory of electrical measurements but the main emphasis is placed, not on applications of the theory, but on instilling correct concepts in the mind of the reader.

Second edition. Illustrated with photographs and diagrams. 27*s*. 6*d*. net.

★

Society: *An Introductory Analysis*

Professor R. M. MacIVER and Professor CHARLES H. PAGE

This volume, which is a revision, with considerable additions, of an earlier text by Professor MacIver, has been revised by the author in collaboration with Professor Page. It is an introductory work in three parts and is concerned primarily with social relationships and does not attempt to study everything that happens in society or under social conditions, though culture, religion, art, invention, and other aspects of human activity and learning are, of course, considered where they throw a light on social relationships.

With charts and tables. 28*s*. net.

Voyages to the Moon

MARJORIE HOPE NICOLSON

For centuries men have dreamed of other worlds beyond our own. Some imaginary travellers to these unknown realms have harnessed birds, others have made artificial wings. Defoe unwittingly anticipated the age of combustion engines, and Swift's Flying Island flew by physical principles that modern science has not yet applied to aviation. Miss Nicolson's history of cosmic speculation includes the works of such men as Lucian, Cicero, Plutarch, Rabelais, Cervantes, Milton, Donne, Swedenborg, Rousseau, Thomas Gray, Samuel Johnson, and the Jesuit scientist and traveller, Kircher.

A CONCISE ECONOMIC HISTORY OF BRITAIN

FROM THE EARLIEST TIMES TO 1750

By

SIR JOHN CLAPHAM

"Of all varieties of history the economic is the most fundamental. Not the most important: foundations exist to carry better things." The late Sir John Clapham's survey of the foundations of life in these islands before the industrial revolution scarcely needs its prefatory warning. Proportion, a judicious balance of careful generalisation against significant detail, and an incisive style, mark it out as popular writing of the best kind. Based on his Cambridge lectures and originally planned to be the first part of an Economic History from the beginnings to the present day, these chapters, completed at the author's death, are issued in their own right as a coherent and self-contained work. *12s. 6d. net*

CAMBRIDGE UNIVERSITY PRESS

16-mm Sound Motion Pictures

A Manual for the Professional and the Amateur

By WILLIAM H. OFFENHAUSER, Jr.

Fellow, Society of Motion Picture Engineers, New York

CONTENTS: Sixteen Millimeter Film and its Relation to other Sizes. Making a 16-mm Picture. 16-mm Film and its Characteristics. Making 16-mm Originals. Dimensions and Standards in 16-mm. The Problem of 16-mm Emulsion Position. Cameras, Camera Equipment, and Cinematography. Sound, Sound Recording, and Sound Recording Characteristics. Sound Recording Equipment and its Arrangement. Editing and Assembly. Preservation and Storage. Processing and Release Printing. Projection and Projectors. The Duplication of Integral Tripack Colour Films. Television and Film. Industrial Applications. Index.

December, 1949. 592 pages. 30 tables. **80/-**

The Analytical Chemistry of Industrial Poisons, Hazards and Solvents

(Second edition, revised and enlarged)

By M. B. JACOBS

Adjunct Professor of Chemistry and Engineering, Brooklyn

CONTENTS: Industrial Hygiene and Industrial Poisons. Sampling. Measurement of Gas Volume and Quantity. Absorbers and Absorbents. Chemical and Microscopic Estimation of Dust and of Silica. Dangerous Metals. Common Poisonous Compounds of Sulphur, Phosphorus and Nitrogen; Oxygen and Ozone. Common Poisonous Compounds of the Halogens. Carbon Monoxide and Dioxide, Hydrocyanic Acid, and Cyanogen. General Methods for the Determination of Combustible and Solvent Vapours. Paraffin and Unsaturated Aliphatic Hydrocarbons. Benzene and the Aromatic Hydrocarbons. Halogenated Hydrocarbons. Alcohols, Glycols and Alcohol-Ethers, and Ethers. Acids, Esters, Aldehydes and Ketones. Phenolic Compounds, Aniline and Derivatives. Chemical Warfare Agents. Appendix. Author and Subject Index.

1949. 806 pages. 121 illustrations 32 tables. **96/-**

MACMILLAN

The Social Structure of Values

RADHAKAMAL MUKERJEE

In this book, an eminent Indian sociologist and economist presents a detailed study of sociology from the point of view of valuation as the motive force in the social universe, the basic link of all human relations, groups and institutions. It is thus an original, social-psychological approach to the subject. The methods of study are both empirical and normative, and lead up to a comparative theory of values and culture dealing with the hierarchy of values, the group structure of value systems, and the conflict and integration of values in different social cultures. The author's synoptic treatment makes the realm of values the focal point for the discussion of sociology, philosophy, ethics, psychology and education. 18s. net.

★

Theoretical Hydrodynamics

Professor L. M. MILNE-THOMSON

The general aim and plan of the First Edition remain unaltered, but the work has been largely rewritten. The subject of two-dimensional motion has been greatly simplified by the discovery of the "circle theorem", which enables the perturbation of a given irrotational flow by the introduction of a circular cylinder to be written down without calculation. This theorem renders trivial problems connected with a single circular cylinder, and, by conformal transformation, cylinders of other cross-sections. Second edition. £3 net.

★

Numerical Methods of Analysis in Engineering (*Successive Corrections*)

Professor L. E. GRINTER (Editor)

When a solution is impracticable, an engineer must be prepared to devise a satisfactory approximation. This approach, so inherent to the practice of engineering, was formalized in the Hardy Cross procedure of moment distribution, which has given rise to a wave of interest in numerical procedures during the past twenty years. Designed for reference in courses in advanced mechanics, indeterminate structures, heat transfer, and graphical and numerical analysis, this volume reproduces ten papers which were read at a symposium held at the Illinois Institute of Technology in the Spring of 1948, and represents a survey of the methods of successive corrections as a substitute for rigorous mathematical analysis. Illustrated with diagrams. 45s. net.

Manual of Cultivated Plants

Most Commonly Grown in the Continental United States and Canada

L. H. BAILEY, and the Staff of the Bailey Hortorium at Cornell University

The purpose of this completely revised and enlarged edition of a well-known work is to provide a ready means for the identification of the species in the usual domestic flora of the continental United States and Canada. Diagnoses, with family keys, of the species grown for food, ornament, utility, and general interest, both in the open and under glass, comprise the main body of the work.

Revised edition. Illustrated with drawings. 1,116 pages. £6 11s. net.

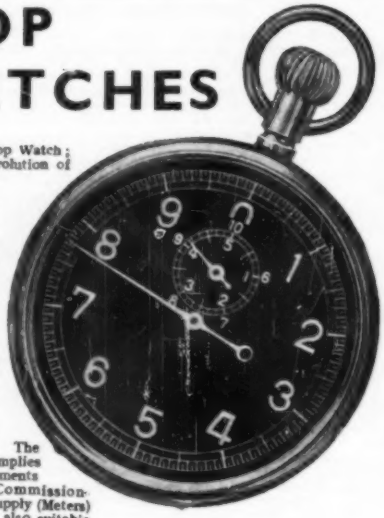
STOP WATCHES



1/10th second Stop Watch; large size; 1 revolution of large hand = 10 seconds. With 5 minute recording dial. Dial is subdivided into 1/20th seconds. 1/30th second escapement.

•

This watch can be passed through the N.P.L. for certification and can, therefore, be classed as a Sub-standard. The watch fully complies with the requirements of the Electricity Commissioners (Electricity Supply (Meters) Act, 1936). It is also suitable for oil viscosity tests.

Many other types of stop watches are also available. Write for illustrated catalogue.

The Unitherm Drier

OUR engineers solved the problem of drying, uniformly, approximately 100 trays of 400 grams of material of D.M. content 20%, by designing the Unitherm Drier. The Drier works on the same principle as a coupled heating and ventilating system. It still conforms, however, to strict laboratory needs, and has been carefully tested under working conditions to provide rapid, uniform drying at temperatures controlled within ± 2° C. up to 105° C.

Full details are given in our leaflet No. 21, and a comprehensive survey of our other products and services is given in Booklet No. 11.

This Trade Mark is a guarantee of high quality materials, a meticulous standard of accuracy, craftsmanship and scientific design

FRESHWATER RD., CHADWELL HEATH, ESSEX

DURABLE GLASSWARE for the RESEARCH WORKER.

- Its low co-efficient of expansion renders PYREX Brand Scientific Glassware almost immune to breakage due to sudden fluctuations of temperature.
- This same low efficient of expansion ($3{\cdot}2 \times 10^{-6}$ per °C.) enables the walls of PYREX Brand laboratory equipment to be made thicker and more robust than those of ordinary glassware, thus greatly reducing the percentage of breakages due to ordinary everyday handling.
- The chemical composition of PYREX Brand Glass makes it completely impervious to attack by acids, (with the exception of hydrofluoric and glacial phosphoric acids).
- The above factors mean that PYREX Brand Scientific Glassware gives the research worker better and more reliable service, while keeping the cost of replacements at the lowest possible level.

PYREX Brand Scientific Glassware is supplied only through Laboratory Furnishers, but illustrated catalogue and two free copies of our Chemist's Notebook will be sent direct on application to us.

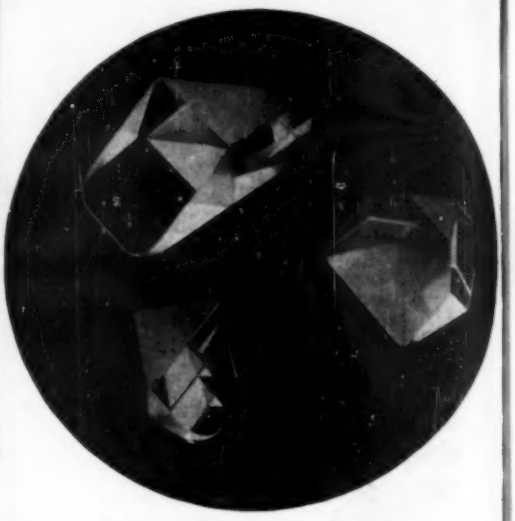
EMERSON



Precision Optical Elements

EMERSON manufacture precision optical elements for the optical, scientific and allied trades, and specialise in Lenses, Prisms and Systems made to clients' own specification. Work is also undertaken for research organisations and for experimental purposes.

Emerson manufactures include Achromatic Objectives, Binocular Objectives, Coloured Filters, Direct Vision Prisms, Fresnel Bi-Prisms, Graticule Discs, Galilean O.G's, Mirrors and Optical Flats.

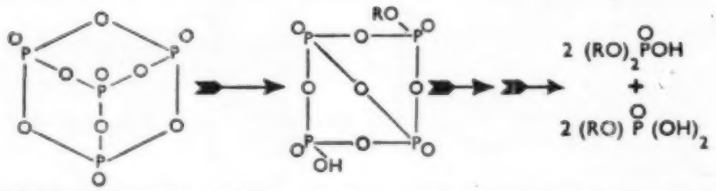
PHOSPHORUS PENTOXIDE AND PRIMARY ALCOHOLS

Phosphorus pentoxide can exist in different polymeric forms. The familiar white powder consists mainly of P_4O_{10}, which is the simplest form. The P_4O_{10} molecule is a symmetrical structure with the P atoms at the corners of a regular tetrahedron.
Controlled reaction of P_4O_{10} with the primary alcohols follows the course:



The first stage all six pairs of anhydride linkages P-O-P are equivalent in reactivity because of the symmetry.
Thereafter several reaction paths are open; the relative rates are such that the final product consists predominantly of dialkyl and monoalkyl phosphoric acids.

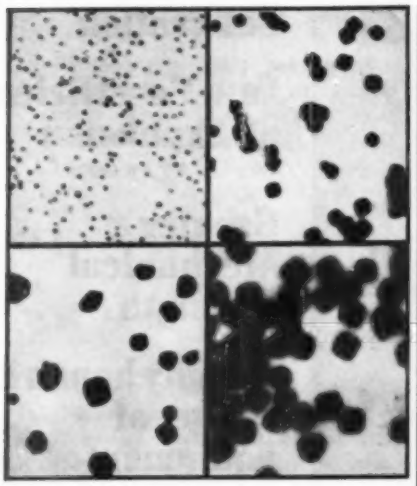
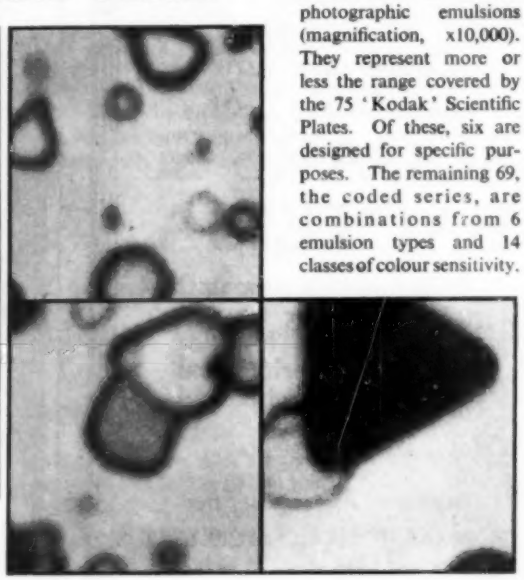
Kodak SCIENTIFIC PLATES





These illustrations show the gamut of grain sizes which occur in modern photographic emulsions (magnification, x10,000). They represent more or less the range covered by the 75 'Kodak' Scientific Plates. Of these, six are designed for specific purposes. The remaining 69, the coded series, are combinations from 6 emulsion types and 14 classes of colour sensitivity.

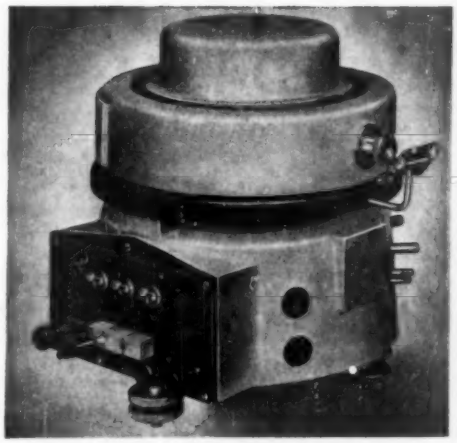
Instruments for Crystallography

Unicam instruments for the X-ray and optical analysis of crystal structure are products of the experience of eminent crystallographers. The quality of Unicam Goniometers and Powder Cameras has been proved in research projects which have provided much of the information on crystal structure now available. Because of their adaptable design they are suitable for a variety of applications in all laboratories engaged in crystallographic research.

A catalogue will gladly be sent on request.



Unicam High Temperature Powder Camera.

Other Unicam instruments for early delivery include Single Crystal Oscillation and Rotation Goniometers, Single Crystal Weissenbergs, Powder Cameras and Two Circle and Horizontal Goniometers.

ULTRASONICS

By Benson Carlin, formerly Product Engineer, Sperry Products, New Jersey. 264 pages, 9 × 6, illust. 1949 42s. 6d.

A pioneer volume dealing with the many engineering aspects of the ultrasonic field, including the vital theory and such information as: The Testing of Materials, Agitation, Ultrasonic Transducers and Ultrasonic Systems.
Electronic considerations and outlines of circuits are specifically reviewed. Interesting work being done in biological, physical, and chemical fields is discussed.

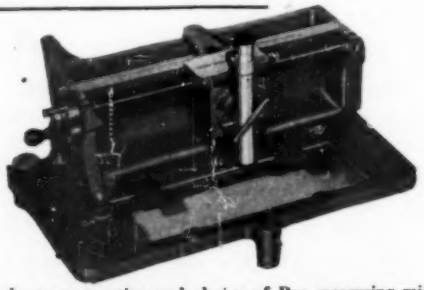
MEASURING MICROSCOPES



The robust construction and design of Pye measuring microscopes is based on over 50 years' experience in the manufacture of Scientific Instruments.

Precision Reading Microscope, Catalogue No. 6145, for use in two horizontal planes range 20 cms. with micrometer head giving direct readings to 0.01 mm. over the entire traverse. The main screw employed is of large diameter and the pitch of 2 mm. allows for quick return to zero; can also be mounted in a vertical position for use as a Table Cathetometer.

Full specifications and prices of various types will be sent on request.
